Design Shelter's Habitat Series (MH Series) portable shelter designs are inspired by military quality and offer exceptional versatility. With its octagonal shape and straightforward construction, this design can be quickly assembled and is exceptionally stable in high wind conditions.

It is an ideal choice for various field applications, including sleeping accommodations, medical operations, command and control centers, communications, and project administration.

FEATURES AND BENEFITS

- Easily assembled by 2-3 trained people without tools in under 15 minutes.
- 6063-T5 and 6061-T6 reinforced extruded tubular aluminium (aircraft grade) frame is structurally superior, anodised to 10 microns.
- Waterproof fabric with high frequency welded seams is easily disinfected and meets NFPA 701 fire retardant spec.
- Full height 1800mm (6ft) vertical interior walls provide maximum working space utilisation.
- Folding aluminium frame double door is lightweight and provides easy access, with optional insulated cover.
- Specially designed for lightweight tactical mobility with a lifespan exceeding 20 years, our shelters offer superior thermal insulation in extreme temperatures.
- Standard one-year warranty with optional extended warranty available on a case-by-case basis for an additional cost.
